

The Breindeer's Christmaths Quiz

5

Blitzen was always pleased when it snowed heavily. It meant he could do his two favourite things at the same time - build snowmen and make maths problems in the snow! His snowmen always had a carrot nose, a top hat and a pipe. Before he began building, he scratched a problem in the snow so he could think about it while he built.

$$\begin{array}{r} H A T \\ + M A N \\ \hline S N O W \end{array}$$

Each letter represents a digit between 1 and 8. Find the value of each letter so that the sum is correct?
