

Christmaths with the Mr Men

1

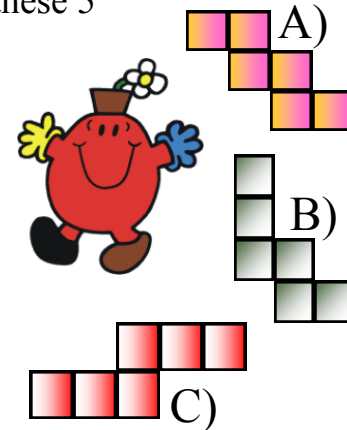

Mr Mean wasn't your average kind of guy. One Christmas he sat making a note of the number of Christmas cards he had sent each year (all to himself) over the course of the last 5 years. The mode of these 5 numbers is 1, the median 2 and the range 3.

What is the mean of the 5 numbers?

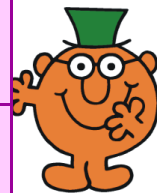

Mr Wrong's deliberate mistake

Mr Wrong was hoping to use less wrapping paper this year. He had some presents to wrap in the shape of cubes and had cut his wrapping paper to size. Which piece was not a net of a cube?

Mr Clever's Ken Ken

4+		18×
6×		

Mr Lazy's incomplete equation

$$90 = D \text{ in a RA}$$

Mr Tickle's rib tickler

Farmer: There are 37 sheep in that field.
 Sheepdog: No, there are 40 sheep in that field.
 Farmer: There's definitely 37.
 Sheepdog: I just rounded them up.
